SUMMARY

MCA graduate with strong proficiency in Python and SQL, skilled in debugging, troubleshooting, and application issue analysis. Experienced in identifying, documenting, and resolving software issues through hands-on projects, with a collaborative, detail-oriented approach. Seeking an entry-level Application Support Engineer role to support critical business systems.

TECHNICAL SKILLS

Programming: Python, SQL, Java
Python: Variables, Conditions, Loops, Functions, Lists, Dictionaries, OOP, Exception Handling
Application Support: Debugging, Troubleshooting, Root Cause Analysis, Issue Documentation, Problem Solving
Database: MySQL, CRUD Operations, Query Optimization
Tools: Git, GitHub, Postman
AI-Assisted Development: Exposure to Generative AI tools (GitHub Copilot, ChatGPT) for code assistance and debugging support
Other: REST APIs, JSON, Linux Basics

EDUCATION

Master of Computer Applications (MCA) 2024–2026
Parul University **CGPA: 9.21/10**

Bachelor of Computer Applications (BCA) 2021–2024
Galgotias University **CGPA: 7.11/10**

Class XII – JAC Board 2020
Jagannath Jain College **51%**

Class X – CBSE 2017
Sacred Heart School **8.2 CGPA**

PROJECTS

Night Club – Event Booking System *Java, SQL*

- Built an event booking application, collaborating on user and booking modules to ensure smooth end-to-end functionality.
- Designed and implemented database operations for storing and retrieving application data, optimizing queries for reliability.
- Tested workflows, identified functional issues, and documented root causes and fixes to support future troubleshooting.

CS Quiz Application *Programming, Firebase*

- Developed a quiz application with authentication, timed questions, scoring, and progress tracking.
- Implemented question handling and score calculation; monitored app behavior during testing to catch performance issues early.
- Diagnosed and resolved functional bugs, documenting issues and resolutions to improve maintainability.

RELEVANT COURSEWORK

Python Programming — Database Management Systems — Object-Oriented Programming — Software Engineering — Data Structures

CORE STRENGTHS

Problem Solving — Debugging — Troubleshooting — Cross-Functional Collaboration — Technical Documentation — Team Collaboration
